TYPE OF BLENDER:  VENTURI  MECHANICAL VALVE  OTHER

SYSTEM IS TO BE USED FOR:

Does system capacity equal total connected load?  YES  NO  
 If no, explain.

FOLLOW DIRECTIONS CAREFULLY

This form including detailed plans shall be furnished to the inspection authority for approval before installation of LPG containers having a water capacity of over two thousand (2,000) gallons, or two (2) or more containers that are to be connected and have a combined capacity exceeding four thousand (4,000) gallons, or when LPG in the liquid phase is to be withdrawn or of a container charging plant where portable containers are to be recharged and filled regardless of the capacity of the storage containers used as the supply for filling containers and cylinders.

Plans shall include: all adjoining property lines, buildings, and roadways, and distances thereto; location and size of containers, and distances from containers to buildings; and loading/unloading points. General layout of piping, pipe supports, pipe protection, pumps, bulkheads, ESV's, buildings, sheds, streams, storm drains, sewer lines, electric lines, service poles, and fencing is required.
